Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 8-25, drawn to a pre-packaged shelf stable food product mix kit, classified in class 426, subclass 120.
- II. Claims 7-17, drawn to food product, classified in class 426, subclass 582.

The inventions are distinct, each from the other because:

The food product as claimed in Group II can be employed in environments other than a pre-packaged mix kit as recited in Group I and with other ingredients or components. For example, the product could be packaged alone or the product would not have to be packaged at all and could be prepared for immediate use. Also, the kit as claimed in Group I does not require a dried cheese filler comprising at least one milk fraction as claimed in Group II. For example, the second food product in dried powder form could be a non-dairy soy based product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination prepares as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
